OFFICIAL ANNOUNCEMENTS & NEWS

[Stablecore Partnership | Q2 Integration
Finextra, Featuring Bank of Utah and
Stablecore](#)

“Technology may change quickly. Trust doesn’t. Our goal is to pair the transparency of new systems with the relationships that have always defined community banking.” — **Bank of Utah President Branden P Hansen**

See More in One Place

Our integration work supports a future where select digital holdings could appear alongside your Bank of Utah accounts within the same banking experience you already know and trust.

A Bank for the Digital Age

Our approach focuses on security, oversight and responsible planning, so any future digital asset capabilities align with the same standards we have used for decades.

Tech, Supported by People

Our team is helping clients understand digital assets and their potential role in banking, while we continue building the secure foundation needed for future offerings.

A 70-Year Tradition of Practical Innovation

We don't adopt technology because it's new. We adopt it when it improves how we serve our clients.

1950s–1970s

Convenience First

Expanded banking access through drive-up banking, early credit card offerings and evolving self-service tools.

1980s–2010s

Digital Modernization

Advanced digital processing and adopted emerging payment technologies as banking shifted toward faster, more connected and mobile experiences.

2020–2025

Seamless Access

Expanded digital account opening and modern banking tools to create more flexible, convenient ways for clients to open and manage accounts.

2026

Preparing for What's Next

Continuing to build secure digital infrastructure designed to support future capabilities as technology, client needs and regulatory frameworks evolve.
