

Digital Wallet: Apple Pay, Google Pay and Samsung Pay

Turn your phone into a digital wallet by conveniently and safely linking your Bank of Utah debit or credit card to one of three major mobile payment apps: Apple Pay, Google Pay or Samsung Pay.

What is a Digital Wallet?

A digital wallet creates a digital version of your debit or credit card and stores it in an app on your mobile device. The app assigns your card a virtual number. Your actual card numbers are never shared.

Benefits of Digital Wallets

- Carry less with you when you shop – pay with just a tap of your mobile device.
- Protect your information with your device's security controls.
- Pay for purchases, while staying safe and socially distanced.

Add Your Bank of Utah Card to Your Digital Wallet

Apple Pay

- Open the Wallet app.
- Tap the plus sign in the upper right corner.
- Use your camera to add your card.
- Enter your card's CVV code.

Google Pay

- Download the Google Pay app.
- Sign into "Payment Methods."
- Click "Add Credit or Debit Card."
- Enter your card information.
